

BOARD OF DIRECTORS MEETING AGENDA

7:00 PM October 25, 2017

Vadnais Heights City Hall, Council Chambers
800 County Road E, East, Vadnais Heights

- I. **Call to Order**, Chair, Dan Jones
- II. **Approval of Agenda**
- III. **Approval of Minutes** from August 23, 2017
- IV. **Visitors and Presentations**
- V. **New Business**
- VI. **Old Business**
 - A. Storm Sewer Utility fee certification to the counties – Res. 03-2017 🐦
 - B. Consideration of Local Plan approval 🐦
 - C. Lambert Creek – Maintenance responsibility and funding consideration– Troy Gilchrist, Kennedy & Graven, Chartered
 - 1. Consideration of survey of targeted portions of Lambert Creek; Engineers analysis RFP 🐦
 - 2. Consideration of maintenance funding request, 🐦
- VII. **Operations and Administration - Reports**
 - A. TEC Report
- VIII. **Discussion**
 - A. Agenda – Jones
- IX. **Administration Communication –**
- XI. **Adjourn**

Next regular meeting: December 13th

MINUTES OF THE BOARD OF DIRECTORS
 August 23, 2017

Attendance		Present	Absent
Dan Jones, Chair	City of White Bear Lake	X	
Jim Lindner, Vice Chair	City of Gem Lake	X	
Rob Rafferty, Secretary-Treasurer	City of Lino Lakes	X	
Ed Prudhon	White Bear Township	X	
Marty Long	City of North Oaks	X	
Terry Nyblom	City of Vadnais Heights	X	
Stephanie McNamara	Administrator	X	
Kristine Jenson	Program Mgr.	X	
Brian Corcoran	Water Resources Mgr.	X	
Nick Voss	Education & Outreach Cord.	X	
Tyler Thompson	Water Resource Tech.	X	

Others in attendance: Margaret Behrens (Ramsey Conservation District), Mark Graham (City of Vadnais Heights Engineer & TEC Chair); Paul Duxbury (White Bear Township TEC representative), Keith Boulais, Premier Materials.

I. Call to Order

The meeting was called to order at 7:00 pm by Chair Jones. A quorum is present for the meeting.

II. Approval of Agenda

A motion was made by Lindner and seconded by Rafferty to approve the agenda as presented. Vote: all aye. Motion passed.

III. Approval of Minutes from July 12, 2017

A motion was made by Prudhon and seconded by Lindner to approve the minutes from the July 12, 2017 Board of Directors Meeting. Vote: all aye. Motion passed.

IV. Visitors and Presentations

Keith Boulais – Premier Materials – briefly presented information on the EcoSoar Kria Ionizer, a machine infuses negatively charged oxygen or super oxide into water. It is used in Japan. It is used in the medical industry but it isn't used in many places because it is hard to develop it. They worked with the Army Corps. It raises the dissolved oxygen levels. It is called a "pesticide device". The super oxide is put back in the water and with that, the DO levels are raised and cleans the water column and sediment of algae bacteria (organic pollutant). Laboratory testing indicates it will work on getting rid of zebra mussels. They have done studies to show this works. They are now looking for a 3rd party test done in open water. They want us to identify the lake and to verify lab tests that were proven to work. The machine reaches ½ mile. They want to partner with someone and have explored a Clean Water Legacy grant to help with costs. They have been talking to the City of North Oaks to pursue testing this in one of the lakes that are infested with zebra mussels. Rafferty asked what it would cost VLAWMO? Boulais said at the moment that it is manpower from VLAWMO but he isn't sure what the costs would be to VLAWMO.

They are looking for a watershed to partner with for a Conservation Partners Grant through the DNR which is due Sept 12. He thinks it will cost about \$500,000. The grant requires a 10% match and he says the company would pay the match. Kristine commented on the Conservation Partners Grant – stating that it has a \$400,000 grant limit and that it is focused on habitat restoration for wetlands and prairies and therefore may not be a good fit for this sort of project. But that there could be some exploration into other grant options. Consensus from the Board that there is not enough time to

pursue the Conservation Partners grant. The Board says they are open to learning more about the product and possibly pursuing a project next year.

Board directed staff to talk more with Mr. Boulais to determine if it would be a good fit for VLAWMO to partner with on and invited Mr. Boulais to come to a VLAWMO TEC meeting and start talking with potential partners.

V. New Business

A. Goose Lake Shoreline Priorities Meeting

While chemical treatments such as alum and spent lime are being evaluated, there remains active erosion on the western shore of West Goose and in the eastern Polar dealership channel. Restoration designs have been made and as yet remain unimplemented. It has been suggested that a meeting of key parties interested in Goose Lake could be useful. On the agenda would be identifying common goals, the roadblocks to progress and possible common priorities for moving forward. There are several stakeholders in this discussion and there are questions to be resolved. The meeting could be held this fall if the Board wishes. **Staff is seeking Board direction on if VLAWMO should facilitate such a meeting and what are VLAWMO's priorities for the shoreline.**

Questions for VLAWMO Board consideration:

- Are some areas of the Goose Lake shoreline in need of stabilization?
- Which areas are in need of stabilization?
- Are there priority areas?
- What have been the hurdles in the past to shoreline stabilization?
- Who owns the priority areas?
- Would some stabilization areas count toward Waste Load Allocations for Stormwater Permits?
- Is there a consensus vision to move forward with?
- What does the VLAWMO Water Plan say?

Local groups and agencies interested in Goose Lake are invited to participate in a discussion focused on the Goose Lake shoreline. This meeting will be facilitated as a circle style discussion.

Stakeholders include: City of White Bear Lake, Ski Otters, DNR, Ramsey County Public Works, Mn Dot, VLAWMO.

Format:

Reframing:

- Definition of common goals for the lake.
- Any complex situation or conflict has aspects that are “stuck” and aspects that are “flexible”. A clear outline of these will support lasting progress for the lake, and can help improve communication habits for future projects and focuses.

Current situation:

- Applying the reframing to the current circumstances.
- Definition of common goals for the shoreline.
- Gathering questions from stakeholders
- What answers do we have? What information is still needed?

Recap & next steps:

- Definition of short term action items. Long range aspirations.
- Outline partner responsibilities. Recap shared vision.

Stephanie showed photos of issues along the shoreline on West Goose and at the channel along Polar Chev into East Goose.

Discussion:

Jones stated that if we are going to consider that Goose Lake is our number 1 priority, why would we do some of the internal projects without addressing these shoreline/channel concerns. Jones stated

that if we tell the Ski Otters to stop what they are doing, it will cause uproar. Rafferty asked if there is a viable issue that is a contained financial investment that could at least be a start. Rafferty felt the West Goose “beach” has a lot of limitations and not much opportunity to do something. Rafferty favors doing something that is favorable for the residents but admits that he doesn’t fully understand the process of how the lakes work. Nyblom stated that he has other priorities and responsibilities rather than this. Jones noted the eroding channel by the car dealership may offer an opportunity while the expansion and reconstruction are going on. Long stated that there is probably more of an issue from Highway 61.

Jones stated the staff is looking for direction for whether we should pursue a meeting to talk about these issues. He recognizes that Mr. Nyblom may have other priorities and it could be up to the Board to adjust its priorities. Jones stated that the sand dumping on the west side needs to stop.

Stephanie stated that we do have a design for stabilizing the beach area that the Ski Otters were part of but it didn’t come to fruition. Nyblom stated that he feels placing rock along the shore would be the best way to protect the shoreline. Jones thinks it would be useful to have all the parties together to talk with everyone and create dialogue. The Board directed staff to pursue this meeting.

VI. Old Business

A. Goose Lake Treatment Design

1. Alum treatment dosing proposal

At the last meeting of the VLAWMO Board there was direction to proceed with securing proposals for alum dosing analysis and design for Goose Lake. There are two proposed agreements before the Board, one to hire Barr Engineering to do the analysis and design for an alum treatment and another with the St. Paul Regional Water Service to accept their contribution of \$5000 to help pay for this work.

1st Agreement: with Barr Engineering

Staff contacted Greg Wilson of Barr Engineering for a proposal to do the follow-up alum treatment design. This proposed agreement is included in your packet. The scope of the work would include sediment cores of both East and West Goose, development of alum dosage and an application plan and a Technical memorandum. Preparation of supporting information for a State grant application is included. That work would be done for \$10,000. After discussion with the City of White Bear Lake engineering staff and Barr, one additional testing site was added as an option for Board and partner consideration. Oak Knoll pond is south of Goose Lake and part of its drainage area. Adding sediment monitoring of this pond as a potential spent lime pilot project to this proposal would allow VLAWMO and its partners to evaluate the spent lime pilot in as a treatment option. The additional sediment coring and analysis would cost \$2000. Having this information positions VLAWMO to do a robust spent lime pilot study if the Board chooses to do so.

Recommendation: staff recommends approval of the Barr Engineering Agreement for Sediment Phosphorus Monitoring of Goose Lake and Oak Knoll Pond’ with the Oak Knoll option for a total cost of \$12,000. There are carry over funds from 2016 to address impaired waters and Lambert Creek that can fund the \$7000 cost to VLAWMO.

Nyblom called Greg Wilson to discuss his concerns about treating West Goose Lake when it is so heavily used by the Ski Otters. He said that Wilson agreed that there would need to be an agreement relating to the use on the lake if we were going to treat it.

2nd Agreement: with St. Paul Regional Water Service for a Goose Lake Sediment Analysis and Alum Dosing Study

The St. Paul Regional Water Service (SPRWS) has been a part of the technical team studying the possibility of alum or spent lime treatment of Goose Lake. They have been an active partner with VLAWMO since the beginning of the watershed. When the feasibility study for

Goose and Wilkinson was completed and it became apparent that additional work was needed to bring a treatment plan to a final design, VLAWMO discussed work and how it would be funded with its partners. SPRWS stepped forward offering to pay \$5000 toward the above study.

Recommendation: staff recommends approval of the Agreement between the Vadnais Lake Area Water Management Organization and the Board of Water Commissioners of the City of Saint Paul for Goose Lake Sediment Analysis and Alum Dosing Study.

Discussion:

The Board was pleased with the fact that there is partnership with this project.

Jones said that even if we don't pursue an alum or spent lime treatment, the results of the sediment studies will be helpful and valuable. Jones stated that he feels that even if we cleaned up Goose, people wouldn't be flocking to the lake but it is a public water and it is on the Impaired List and we have deemed it a priority. Rafferty stated that on Peltier Lake, they limited boat traffic to deal with water quality and they ended up finding out that it was something else affecting the water quality.

It was moved by Long & Rafferty to approve both the contract with Barr to complete the alum dosing study for \$12,000 and the agreement with SPRWS to accept \$5000 towards the work. Vote: All aye. Motion passed.

2. Spent Lime Pilot Funding

Staff understood there to be direction to pursue what would be involved in a pilot spent lime study as an alternative to alum treatments for phosphorus reduction. An additional \$10,000 was added to the 2018 budget help fund spent lime pilot project development. Two issues were apparent: one was funding amount and timing and the other was potentially completing necessary summer monitoring that could be used in a winter analysis and pilot development. To deal with the second issue – was there information that needed to be collected in the summer if a pilot project plan was developed in the winter? Sediment coring in Oak Knoll pond would be needed as well as intensive late summer water quality monitoring. Using Oak Knoll pond as a control basin could help clarify whether or not the spent lime is effective when some of the unique variables on West Goose (higher wind stirring and intensive use by water skiers) are removed. The sediment coring could be done if the Board approves the option on the Barr Agreement to do the Oak Knoll sediment work (\$2000). VLAWMO staff has discussed the water sample collection and this could be added to the existing monitoring. Lab analysis of those samples would be about \$1200.

The original very rough estimate from Barr to develop this pilot project which would now involve treating West Goose Lake and Oak Knoll pond as a control basin was \$15,000 - \$35,000. We don't have a defined proposal from Barr with a solid cost at this time. Work on this portion of the possible treatment design could be delayed until 2018 when the \$20,000 would be available. This funding may not be enough. But we could go to our partners again or redirect additional VLAWMO funds.

For Board Consideration: Does the Board wish to reallocate the remaining \$20,000 in the 2017 LL2 grant program to the Goose Lake subwatershed to assist with funding for this work?

Discussion:

It was moved by Jones & Lindner that VLAWMO put \$2000 toward the spent lime preliminary analysis. Vote: All aye. Motion passed. Jones also stated that we can ask the City of White Bear Lake for the \$1200 for the additional testing and if they approve it, we can do the additional testing this year.

B. Storm Sewer Utility Rate Establishment – Resolution 02-2017

The annual SSU rates are based on the budget approved by the Board at its last meeting for the following year. The Storm Sewer Utility is based on the amount of impervious surface generally associated with different land use types and provides the major financial support for watershed activities.

As discussed at the July Board meeting when the 2018 Budget was passed, the SSU rates will go up. And increase of 14.98% is less than the 15.49% total budget increase due to a large division in North Oaks. This year we anticipate the SSU will provide a sustaining level of income for the anticipated projects and programs identified in the new Water Plan. In other words, we are not drawing down our reserves to cover operating expenses. Grants have helped defray some of the costs and allowed VLAWMO to do more than is reflected in annual budget. But they are an unreliable source of income.

The proposed 2018 SSU annual rate is \$42.63/unit or \$61.44/acre. This is an increase of 14.98% from last year. Single family residential units will increase by \$5.79/year or about \$0.48/month. On nonresidential property the rate increased \$8.04/acre or \$0.67/month. The additional parcels from the boundary change helped absorb some of the increase.

Again, our budget is no longer being subsidized by drawing down reserves. The SSU is at a sustainable level. This budget begins to address priorities in the 2017-26 Water Plan and the watershed ditch authority responsibilities. The budgets anticipated in 2017-2026 Water Plan anticipate a fairly modest annual operating increase. More substantial increases are seen in the capital part of the budget. This rate includes a 0.9% buffer to account for subsequent parcel changes, manual overrides and delinquent payments.

Recommendation: Approval of Resolution 02-2017 setting the Storm Sewer Utility Rates for 2018.

Discussion:

Jones reiterated that the recent increases in SSU were due to providing competitive salaries and benefits for employees and for stepping up our programs and projects which was necessary. Long stated that we need to be responsible with our budget and take care of our staff but that he thinks we will have some of the team leaders leaving in the next few years and we need to keep that in mind as we think about how we move forward.

Rafferty reiterated that addressing health insurance costs is a priority for him. He feels employees need to have insurance and is concerned about rising costs. Stephanie stated that we will be receiving information for next year’s health insurance. Rafferty stated that he feels we need to take care of our employees and wants to work with staff at addressing better health insurance options.

RESOLUTION NO. 02-2017

A RESOLUTION APPROVING THE STORMSEWER UTILITY RATES FOR 2018.

WHEREAS, the 2018 Budget of the Vadnais Lake Area Water Management Organization (VLAWMO) has been approved by the VLAWMO Board of Directors and

WHEREAS, Storm Sewer Utility (SSU) Rule of the Vadnais Lake Area Water Management Organization, has been applied to the properties within the boundary,

NOW, THEREFORE, BE IT RESOLVED BY THE BOARD OF THE VADNAIS LAKE AREA WATER MANAGEMENT ORGANIZATION, The SSU Rates for 2018 will be as follows:

Classification	Total Amount	R.E.F.	Rate
Residential 1- 3 units	\$436,350.36	1.00	\$42.63 / Unit
Residential 4 or more	\$28,218.41	2.72	\$61.44 / Acre
Commercial	\$137,795.53	4.23	\$61.44 / Acre
Industrial	\$71,073.54	3.30	\$61.44 / Acre

Institutional	\$61,462.22	3.30	\$61.44 / Acre
Golf courses	\$10,105.91	0.74	\$61.44 / Acre
Agricultural	\$7,303.07	0.25	\$61.44 / Acre
Vacant/Road/RR/Water	\$0	Exempt	\$0.00

A motion was made by Lindner and seconded by Prudhon to approve Resolution 02-2017 to set the 2018 Storm Sewer Utility Rates. Vote: all aye. Motion passed

C. Lambert Creek Maintenance

Corcoran reported on information he has gathered since the previous Board meeting. Moving forward on the Lambert Creek drainage maintenance and VLAWMO’s responsibility as ditch authority, staff contacted the DNR for their requirements when doing maintenance within public waters. Below is the DNR process and alternatives that could help improve flow through the system

When a ditch authority undertakes a public drainage ditch repair or project in or near public waters, DNR has a statutory obligation under MN Statute Chapters 103G and/or 103E to exercise oversight over the project. This is because public ditch repairs and projects have the potential to affect public waters because excavation is involved

To meet this definition (103E.701), the ditch authority would need to either have original design plans/as-built surveys for the public ditch or do soil borings and other analysis to determine the original dimensions of the ditch prior to excavation. The ditch repair has to be maintenance of an existing channel to original dimensions, not an improvement. So the ditch authority has to have documentation of the original channel dimensions. Also, prior to a ditch repair project through a public water wetland, DNR would need to survey the OHW and the outlet elevation of the public water (there hasn’t been an OHW survey done yet for this PW-wetland).

There are alternatives that the DNR provided that could help improve flow through the public water wetland and that would avoid the need to meet ditch law requirements:

1. Apply for a DNR aquatic plant management permit. This would allow spraying herbicide to kill vegetation in the wetland to help open up an area to facilitate flow. This approach does not require a public waters permit.
2. If needed, apply for a public waters permit to excavate at inlets/outlets to the wetland, to help facilitate flow. This process is pretty straightforward. The excavation is limited to that required to improve flow at the inlets/outlets, with excavation being done from land (no equipment enters enter the wetland). This could be done in conjunction with herbicide treatment.
3. If needed, remove the root mass of a portion of cattails in the wetland to help facilitate flow. This would require a public waters permit. Excavation depth would be limited to the depth of the cattail root mass and would not create an excavated channel. Detailed project plans would be required as part of the permit, specifically depth of excavation, documentation showing that there wouldn’t be negative impacts to downstream flows, and a description of how equipment would access the wetland. This has the most impact of the options listed here. A permit would also be required from the Army CORPS for any work done in this system, WCA rules would not apply for work below the OHW of a public water in the system.

Discussion:

Nyblom passed out a photo of a culvert at County Road F where the land has covered the culvert. He thinks the ditch bottom would be at the bottom of the culvert. He doesn’t understand why the 1987 survey wouldn’t be applicable for the DNR to prove the ditch elevations. Corcoran stated that we only had the 1987 elevations from when they dredged it at that time and we

couldn't find any paperwork regarding permits. The DNR is stating we need to provide them with the information proving the original size of the ditch.

Nyblom asked if we had gotten any costs for debris removal on County Ditch 14. He stated that the July meeting minutes state that the Board directed staff to get bids for debris removal and bids for survey. We hadn't done that and Nyblom asked why we hadn't yet. Stephanie said we could get costs for the next meeting. Jones and Lindner stated that staff pursued background information that are causing obstacles that we have to still work through.

Graham stated that he is trying to find bids and quotes for Branch 5 but it isn't an easy thing to do and there aren't many people who do it. He noted the ditch has trees and debris.

Long asked if we could call Barr Engineering to get an estimate for costs for a survey because we can't get bids until we have an RFP and we don't know exactly what we are asking for.

Nyblom stated that if we have to wait until there is damage to properties or if the homeowners are doing the removal work, then maybe we don't tax them. Jones asked if it can be proven that the trees are causing property damage. Nyblom responded no, it is based on observation and opinion. Lindner stated that he would support us pursuing this more. Long stated the City of North Oaks pays for all their ditch maintenance.

Graham stated that the struggle is determining who should pay for maintenance work on the ditch. If it is VLAWMO, there is no budget for that. So is it the City? His goal was to have the City pay for the removal but a member of the City Council felt that the City shouldn't pay for the County Ditch 14 so he asks the Board to determine how this is figured out.

Corcoran asked for clarification of the Board direction. The Board requested costs for debris removal in County Ditch 14 and costs for surveys on Ditch 14.

Jones stated we budgeted an extra \$30,000 to address this and it won't cover much but hopefully it will cover the cost of the survey.

D. Consideration of Ditch Authority – Legal Opinion

Clarifying authority and responsibility as a ditch authority continues to be an ongoing discussion. We have some legal guidance from Troy Gilchrist, the VLAWMO attorney which provides further background and legal argument for how we should manage the ditch and its branches. The following is McNamara's summary of his opinion.

- Through State Statute and the VLAWMO JPA, VLAWMO should manage the ditch under section 103B which basically means VLAWMO will manage the ditch as is identified in the our Water Plan.
- A petition by individuals or groups would not be accepted because we are not managing it under ditch law (103E) we are using watershed plan law (103B). VLAWMO could always be sued of course. The watershed could be found liable if it "fails to maintain the ditches and that failure allegedly results in damage to properties."
- The VLAWMO responsibility to the ditch is much like municipal responsibility to maintain roadways in a safe condition that does not cause damage to others property.
- VLAWMO may want to consider hiring an engineer to inspect all or portions of the ditch for maintenance issues. VLAWMO staff and municipal partners have been checking for erosion or obstructions. The inspection that might be done by engineers would also include hydraulic capacity and rate. Hydrologic and hydraulic modeling (H & H) would also help us understand the plumbing of this system.
- How we manage the ditch should be defined in our water plan. The VLAWMO Plan can be found at the following link: [VLAWMO Water Plan](#). There are references under Priority Issue 6 (pg. 31)

Localized flooding; Under Subwatershed Activities for Lambert Creek (pf.47) and of course the budget where we pay for work (pg. 57) identifies stream restoration projects being funded periodically. The Water Plan may be updated and the ditch management plan further clarified. VLAWMO would go through a plan amendment process with BWSR and our stakeholders to do that.

The following are the questions posed to our attorney and the answers provided. The email includes more historical precedent for some of the opinions. The assessment question was postponed for the time being but can certainly be a follow-up review.

1. As ditch authority, what is VLAWMO required to do?

With the authority provided under Section VI, Subd. 5 to repair, improve, and maintain the drainage system under the MWO's in Chapter 103B comes a general duty to keep the system reasonably maintained as there are no specific duties related to drainage system in the WMO's authority under Chapter 103B. This is similar to the general duty a city has to keep its streets open and maintained (i.e., there is not a list of statutory tasks a city must perform on its streets (there are strings attached to state funding, but that is a different matter)).

What work is to be done on the ditch system to satisfy this general duty is up to the commission to decide. If the condition of one of the ditches is such that it is creating problems for the adjacent property owners, the commission would reasonably want to take action to correct the situation. Though any such work must be carried out in conformance with the watershed plan.

Given the fact that the commission is to manage the drainage system that was transferred to it in accordance with its authority under Chapter 103B and must conform to its watershed plan, I recommend the commission provide for any work it proposes to perform on the ditches as a capital improvement project under its plan. I do not get involved with developing the details of the capital improvement program, but if there are on-going maintenance duties the commission wants to provide for I do not see why that could not be identified and incorporated into the plan.

2. Could VLAWMO be petitioned or sued to do work on the ditch by individuals or perhaps municipalities?

Because the commission is managing the ditches under Chapter 103B, not Chapter 103E, in my view the petition procedure set out in Chapter 103E does not apply. The answer to second part of your question, can we be sued, is always yes. We cannot control what people may choose to sue over, but I am not concerned that the commission would be successfully challenged for not carrying out some specific duty with respect to the ditches under Chapter 103E since it is not operating under that authority. If, however, the commission fails to maintain the ditches and that failure allegedly results in damage to properties, then there could be liability. This goes back to the general duty I mentioned – a failure to maintain that results in damage to others can constitute a breach of that duty for which liability can result.

3. What process should we be following if we identify a need along the ditch to assess the options and then implement a possible best management process?

My thought is that commission would have its engineer review the ditches, determine if any work/project is needed to keep them properly maintained, and then schedule it as a capital project under the plan. In other words, the commission would take this on as its own project that it would fund, contract for, and perform/construct. This is, of course, different from its typical role of assisting in funding projects constructed by others. I suggest the commission program in the review by the engineer on some regular basis as recommended by the engineer and seek input from the engineer as to whether there are other issues the commission should be considering as part of its general duty to keep the ditches maintained. I suspect finding the funds to pay for the inspections and any needed work will be of particular importance to the commission. I didn't research that issue, but my initial impression is that since this work is part of the authority given to the commission, there should be no (legal) issue with it using its funds for that purpose.

Discussion:

Jones stated that we need to keep moving ahead on this and press to find the answer. Long asked if BWSR could help in find the answers regarding the difference between ditch authority and financial responsibility.

Stephanie stated that an option for paying for projects would be an assessment over a drainage area and the municipalities would collect that money and could do it like they do for road projects or pay for it through City SSU fees.

Prudhon asked if it would be helpful for the attorney was present at the next meeting. Jones stated that this type of policy discussion isn't really a fit for a Board meeting. It is dragging out these meetings very long and while he dislikes having extra meetings, we may need to have a meeting that addresses this particular issue. Board will send Stephanie their questions for the attorney to answer and she can bring the responses to the next meeting.

VII. Operations and Administration - Reports

A. Education & Outreach

1. Community Outreach Update

- We currently have 6 drains adopted in the adopt-a-drain program.
- During our bothing season, we gave away 5 rain barrels and grew our email list by 75 new email subscriptions to our seasonal newsletter.
- A partnership with an Eagle Scout (Erik Barsness) provided valuable service hours at the VLAWMO booth, 16 labeled stormdrains in Vadnais Heights, and 35 lbs. of debris (sand, leaves, grass) removed from these stormdrains. Such information is gathered with each stormdrain labeling project and will compile a total at the end of each year.
- Water Bugs at Sucker Channel has had 6 events with 77 participants. To accompany workshops, informational VLAWMO brochures are provided to students to take home to parents/guardians.
- VLAWMO staff is holding a 'tour the watershed' presentation on August 30th at 6-7:30 pm at the VH Fire Department. We'll cover watershed history, lakes and Lambert Creek, future projects and goals, and take Q&A. The presentation will be recorded for local cable channel 16.
- VLAWMO is partnering with Rice Creek, WBL, Mahtomedi, and Conservation Minnesota to host a community water meeting in conjunction with the State-wide "25 by 25" initiative. The goal, from Governor Dayton, is to improve MN water quality 25% by 2025. The goal of the meeting is to collect comment how to improve water quality at the local level. VLAWMO will be present with a table, will provide a brief presentation introducing what watersheds do for water resources, and will be available for questions. We see this as an opportunity to keep VLAWMO connected with neighboring organizations and be present where relevant. The meeting will take place on September 21 at 6:30-8:30pm, at WBL City Hall.

2. Comprehensive Plan Assistance

VLAWMO is in contact with each City and Township regarding the updating of their comprehensive plans. With all cities yet to complete a complete draft, VLAWMO has provided an initial summary of our watershed comprehensive plan to maintain familiarity throughout the plan process.

We are now forming detailed assistance to help specify city-specific standards, nutrient loading, and goals, based on the 2013 TMDL, VLAWMO water policy, and VLAWMO

comprehensive plan. Initial results will be ready this fall, and will be ongoing with the planning process as needed.

B. TEC Report to the Board

Mark Graham presented the TEC Report to the Board and summarized items the TEC has been involved with on behalf of VLAWMO.

Jones stated that while we like having Graham here but he doesn't have to be. Graham stated he doesn't mind coming and will continue to do so.

C. Finance

August finds our expenses and income right about where it was anticipated. 59% of the operations budget and 42% of the Capital budget have been expended as reflected in the Treasurers Report summary. Expenses are coming in under the Whitaker treatment wetland project. And the first three reimbursement payments have been received as well.

D. Project Updates

1. Sucker Channel Restoration Project

This project went out for bid. Urban Companies was the lowest responsible bidder.

2. Birch Lake

Jenson submitted an application for a Clean Water Fund Grant for this project. We will not hear any decisions until December. The City of WBL passed a resolution supporting this project and pledging \$15,000 towards the match requirements. The high end cost estimate is \$121,000. Kristine's request was for \$97,000 which would require a nearly \$30,000 match.

3. Whitaker Treatment Wetlands

The contractor is moving forward with coordinating construction, which is set to begin October 2nd. It is expected to last 4-6 weeks. Reimbursement requests to the LCCMR for the grant we were awarded have been submitted and accepted.

E. Planning – Charley Lake Sustainable Lake Management Plan (SLMP)

Staff have been working on the latest SLMP, focusing on Charley Lake. As discussed in the 10 Year Watershed Management Plan, VLAWMO is committed to producing these reports on an annual basis. A chart with the schedule for these reports is shown below:

Lake	Year Completed	Year Updated
Charley	2017	
Deep	2018	
Amelia	2019	
Pleasant	2020	
East Vadnais	2021	
Sucker	2022	
West Vadnais	2023	
Birch	2008	2016/2026
Tamarack	2009	2019
Gilfillan	2010	2020

Gem	2015	2024
Black	2015	2025

As part of our SLMP preparation, we have been working with the Ramsey Conservation District to conduct bathymetry and vegetation surveys. The bathymetry gives us a picture of what the lake bottom looks like and the general make-up of the sediment (hard vs. soft soils). By understanding the shape and structure of the lake bottom, we get a better idea as to whether

certain fish or other water creatures can thrive there as well as where we would likely find vegetation. The vegetation study gives us a picture of what plants live in the lake as well as along the shoreline. It helps us identify if there are any invasive plants and determine the spread of those plants.

The goal is to have the SLMP complete by the end of this year. Kristine has been working with Tyler on the production of maps as well as the writing of the report. Previous SLMPs are available for other lakes on our website. These reports are useful tools in helping VLAWMO determine the current health of the lake as well as what projects we should be planning for in the future.

VIII. Discussion

A. Capstone Project

Stephanie stated that the City of North Oaks is pursuing a study with the University of MN Capstone Project to analyze the chain of lakes. The North Oaks Homeowners Association contacted Barr Engineering and a staff member who is also an adjunct professor there has been talking with them about what could be pursued.

B. Agenda

Jones discussed how he has been shifting the agenda – case in point, the Visitors and Presentation item which we had tonight. He wants to limit the time for this to be 5-10 minutes. He is still trying to tighten and tweak things.

IX. Administration Communication

Project site tour in the fall or spring – would the Board be interested in doing an informal tour on September 27 to see some of the projects we talk about at meetings? Jones said to just set it up and post it so that if there is quorum, they obey open meeting laws.

X. Public Comment

XI. Adjourn

A motion was made by Lindner and seconded by Rafferty to adjourn at 9:23pm. Vote: all aye. Motion passed.

Minutes compiled and submitted by Kristine Jensen.

Re: **VI. A** Storm Sewer Utility Certification to Ramsey and Anoka Counties

This is the final step in our annual process to complete the Storm Sewer Utility for 2018. The Budget with its anticipated income from the SSU was set in July that drove the rates for residential and non-residential properties which were approved in August. Staff has been working with our SSU consultant and the counties to review property divisions and other updates since then. The charges to each non-exempt parcel are now ready to be certified as we do each October.

Please note the Parcel lists for each county will be sent electronically only as they are lengthy. The Resolution for Certification is included in the packet.

Vadnais Lake Area Water Management Organization

RESOLUTION 03-2017
Of the Vadnais Lake Area Water Management Organization (VLAWMO)

October 25, 2017

The Board of Directors of the Vadnais Lake Area Water Management Organization met in a regular meeting at the Vadnais Heights City Hall on Wednesday, the 25th day of October, 2017 at 7:00 o'clock p.m.

The following members were present:

Dan Jones, City of White Bear Lake
Jim Lindner, City of Gem Lake
Rob Rafferty, City of Lino Lakes
Terry Nyblom, City of Vadnais Heights
Ed Prudhon, Town of White Bear
Marty Long, City of North Oaks

The following members were absent:

Director _____ introduced the following resolution and moved its adoption:

RESOLUTION 03-2017

A RESOLUTION CERTIFYING STORM SEWER UTILITY CHARGES TO THE COUNTY AUDITOR TO BE ASSESSED ON REAL ESTATE TAXES PAYABLE IN 2018.

WHEREAS, Minnesota Law 2008, Chapter 366, Article 6, Section 47 provides that the Vadnais Lake Area Water Management Organization may certify to the County Auditors the amounts of storm sewer utility charges to be collected on said premises the ensuing year; and

WHEREAS, the Storm Sewer Utility (SSU) Rule of the Vadnais Lake Area Water Management Organization, provides that the watershed may certify to the County Auditors the amounts of unpaid utility charges to be collected as part of the tax levy/special assessments on said premises the ensuing year;

NOW, THEREFORE, BE IT RESOLVED BY THE BOARD OF THE VADNAIS LAKE AREA WATER MANAGEMENT ORGANIZATION, AS FOLLOWS:

1. Attachments 1 and 2 attached hereto and made a part thereof by reference is a list of parcels of real property lying within the VLAWMO limits of which have surface water runoff and on which there are service charges payable in 2018.
2. The Board hereby certifies said list and requests the Ramsey County Auditor and Anoka County Auditor to include in the real estate taxes/assessments due the amount set forth in Attachments 1 and 2 with taxes/assessments due and payable in 2018.
3. The VLAWMO Administrator is directed to tender a certified copy of this Resolution to the Ramsey and Anoka County Departments of Property Records and Revenue.

The motion for adoption of the foregoing resolution was duly seconded by member Director Jones and upon vote being taken thereon, the following voted in favor thereof:

Directors:

and the following voted against the same:

None

Whereupon the resolution was declared passed and adopted.

Dan Jones, Chair

Date

VADNAIS LAKE AREA WATER MANAGEMENT ORGANIZATION

I, the undersigned, Administrator of the Vadnais Lake Area Water Management Organization, hereby certify that I have carefully compared and attached the foregoing extract of minutes of a regular meeting of the Board of Directors of said watershed held on the 26rd day of October 2016, with the original thereof on file in my office.

WITNESSED BY the Watershed Administrator this 25th day of October 2017.

Stephanie McNamara, Administrator

To: the Board of Directors

From: Stephanie McNamara

Re: VI. B Local Water Plan Approvals – Gem Lake and Vadnais Heights

Local Water Plan updates. Last year at this time VLAWMO finished its 10-year Comprehensive Water Plan with approval from BWSR. Under State statute all of the local (municipal) governments have until December 31, 2018 to update their local water plans to be consistent with the watershed plans. It has the positive effect of insisting cities and watersheds talk to each other about water management, clarifying priorities and setting implementation steps and timelines for reaching our common goals. As VLAWMO, a non-permitting watershed, looks to our municipalities to enforce our standards, it provides a chance to talk about where we have updated our standards and how they are going to ensure those protections are in place. VLAWMO is charged with reviewing all six local water plans of the communities within VLAWMO for consistency with the VLAWMO plan. If they are found to be consistent, then the VLAWMO Board will approve them. The first two plans have come in. So by statute, a 60 day clock started for VLAWMO action. November 4th is the deadline. The only regular meeting of the Board is Oct. 25th.

Staff has reviewed both the Gem Lake and Vadnais Heights plans for consistency with the VLAWMO plan. Preliminary comments have been provided to both cities. The Metropolitan County and Ramsey County have an opportunity to comment and VLAWMO is required to consider their comments. Met Council has found the Capital Improvement portion of the implementation plan to fully meet the requirements set out in MN Rules Ch. 8410: “a capital improvement program that sets forth, by year, details of each contemplated capital improvement that includes the schedule, estimated cost, and funding source.” The communities have not had an opportunity respond and possibly make changes. VLAWMO has not seen the updated Water Plans for either community.

Recommendation: Staff will request both communities allow an extension of time to allow changes to be made to the local water plans, VLAWMO to review the updated Plans and make recommendation at an upcoming Board meeting. If that extension is not granted by Board meeting time, staff recommends the Board deny approval.

RE: VI.C Lambert Creek maintainance and funding responsibilities.

The following is the question discussed at the August Board meeting: does being the ditch authority mean VLAWMO is also responsible for paying for maintenance or improvement projects?

Here is the response from Troy Gilchrist who will be attending our meeting to facilitate Board discussion of this question and others.

“My view is that the WMO is more directly responsible for the repair and maintenance of the accepted ditch system than it is over other waterways in its area. As such, I recommend the WMO work to program some funds into its Plan for future work as it determines is appropriate. That is really in the best interests of the WMO since it has a duty related to this ditch system that does not exist with respect to other waterways in the area. With the more direct duty comes a greater risk of liability if an alleged failure by the WMO to maintain the ditch results in damage to property.

That is not to say the city in which the ditch is located cannot, or should not, assist with keeping the ditch maintained. The maintenance and improvement of ditches managed under Minnesota Statutes, Chapter 103E contemplates those benefited (including local governments) from such work need to pay their share of taht work. While the WMO is not operating under Chapter 103E, the policy concept of paying for a project that benefits the local government and its residents is as valid in this situation as it is under Chapter 103E.

It strikes me that a conversation should occur between the WMO and the city as part of developing a future amendment to the Plan to provide funding for ditch projects on ways the WMO and city can cooperate to get the work done. I have not been directly involved in how your WMO handles its projects, but I suspect it is like my other WMOs in that the member communities typically undertake projects with funding support from the WMO. The same process can be developed for funding and completing projects on this ditch.

I hope this helps. Feel free to let me know if there are any other questions.”

Re: VI.C.1 Lambert Creek – Consideration of survey of specific portion of Lambert Creek; consideration of Engineers report consistent with 103E; discussion of third step – hydraulic modeling of Lambert Creek

Estimates for survey work from the Koehler flume to Lambert Lake have been received. VLAWMO received 3 estimates for the survey work with E.G Rud being the lowest at \$4,490. This is for work to survey the creek stretch in yellow on the below map, including cross-sections, creek elevations and pipe inverts;

Estimates below:

<u>Survey Work</u>	<u>Cost</u>
Lake & Land Surveying	\$6,000
E.G Rud	\$4,490
Wenck	\$12,100-\$15,300*

*\$15,300 includes optional "Task 1" from Wenck Survey Scope (\$3,200 on top of \$12,100) to compile collected survey data and comparing it with historical data to show ditch aggradation, erosion, and how it compares to the ditch's condition after the last time the ditch was maintained and surveyed in the 1980s. Essentially, the Wenck survey would give us a useable engineer's technical memo disseminating exactly how much the ditch has filled in and where, as well as recommendations for repair and restoration that are consistent with BWSR Drainage Database requirements.

The Wenck proposal came in at packet publication time but we wanted to include it for your consideration as it does take us another step in the direction the Watershed may want to go. Comparing it to the other straight survey proposals is a bit like comparing apples and oranges. The basic engineers report provides the additional information in the previous paragraph and the survey information is in a format that can be entered into the state BWSR database. There is a third step the Board may wish to consider in 2018. This would utilize the above information and put it into a hydraulic model to really understand the capacity of the creek and its branches. This would allow us to understand why high water levels are happening in certain places and what could be done to respond to it. It would probably allow VLAWMO to do more long term planning.

Both of the other survey bids include signed and certified ditch cross sections in PDF and AutoCAD format, providing the information for sedimentation calculations to be made, but not explicitly providing them. VLAWMO would then be able to compare this data to that of the 1987 survey data and calculate, or hire someone to calculate from there, however, the Wenck option would provide us with this information of where the Ditch has filled in and how much in their technical memo. If the Wenck option is chosen, from here VLAWMO could choose to have an official Engineers Report composed by Wenck, at an additional cost (on top of \$15,300), to be used for future maintenance.

As noted above, the survey work is proposed only on this lower section of Lambert Creek. This includes some of the area where residents were expressing concern about high water. We understand those water levels have dropped at this time. The survey work could help inform hydraulic capacity modeling of the creek. Funding for the survey could come from the project feasibility and research budget. All of these companies are reputable companies. The following options are offered for Board consideration:

1. No action.
2. Approve the lowest survey proposal for implementation within the next few months.
3. Approve the highest survey proposal to get all of the information needed and beyond for moving forward in the future. This would produce a basic engineering report consistent with 103E.
4. Send a Request for Proposal and advertise as appropriate, to secure bids for engineer services. The engineer would utilize existing information to model the capacity of the creek, the as built profiles, and recommend a future maintenance schedule. The engineer could also potentially inspect existing structures for upcoming maintenance needs.

An RFP for Engineering services may include the following scope:

- Reviewing records of the ditch to establish original ditch profile and capacity to the extent possible.
- Review records of the ditch cleaning in 1987 to establish ditch profile and capacity to the extent possible.
- Review area where high water concerns have been identified.
- Utilize available information to produce a updated hydraulic model of Lambert creek and updated current profile information for the creek
- Identify potential areas of maintenance needs and potential improvement practices
- Recommend plan of routine ditch assessment including evaluation of existing structures along the creek. This would be used to identify and schedule future maintenance needs.

Confirmation of Work

Ordered by: Brian Corcoran
Water Resources Manager
Name: VLAWMO
800 East County Road E
Vadnais Heights, MN 55127

Phone: 651-204-6075

Scope of Work Requested: Topography Survey of Ditch Branch #5A from Bear Avenue North to about South Oak Drive. Get topography of the bottom of ditch and about 10 feet on both sides to the top of bank. Get cross section of creek including bottom of creek for sediment calculation purposes. Get culverts tops and inverts. Tie ditch location to Ramsey County Coordinate Systems. Work to be done this Fall when leaves are off the trees. Receivables: PDF drawing and AutoCAD drawing. **Cost: Hourly**
Assume 4 days in the field and 1 day of office time.

Budget about: \$6000.00

Based upon the following Hourly Rates:

One-man survey crew with robotic total station \$150.00/hr
Two Man survey crew \$150.00/hr
Professional Surveyor/Engineer \$150.00/hr
Technician \$115.00/hr

Site Description: Ditch Branch # 5A, Vadnais Heights, Minnesota.
Site Address: Bear Avenue North to about South Oak Drive

Please State Visa or MasterCard, please enter your account number and expiration date.
Account No.: _____-_____-_____-_____ Exp. Date: _____

Payment is due upon receipt of statement. This work order and estimated costs apply only to the scope of work described above. Any additional work will be billed at our hourly rates in addition to the above estimate. A 1.5% per month service charge will be added to any balance after 30 days. A mechanics lien will be placed on property for any balance due after 75 days. All legal, collection and filing fees, and expenses incurred will be paid by the owner or agent if such action becomes necessary. All checks payable to Lake & Land Surveying, Inc. Please sign and return to sender with requested retainer in sufficient time to complete the project.

Statutory Lien Notice:

- (a) Any person or company supplying labor or materials for this improvement to your property may file a lien against your property if that person or company is not paid for the contributions.
- (b) Under Minnesota law, you have the right to pay persons who supplied labor or materials for this improvement directly and deduct this amount from our contract price, or withhold the amounts due them from us until 120 days after completion of the improvement unless we give you a lien waiver signed by persons who supplied any labor or material for the improvement and who gave you timely notice.

Re: Estimate for Survey Work: Lambert Creek

Date: September 29, 2017

E17146

Following review of exhibit provided, county mapping, and existing survey information, we have prepared the below estimate and anticipated scope of work for the base survey work for your Lambert Creek project.

Base Mapping Lambert Creek

(Scope entails preparing an as-built survey for Lambert Creek- Ditch 14.)

- Office setup and boundary computations for field work.
- Field establish horizontal (Ramsey County datum) and vertical (NAVD 88) survey control.
- Field as-built bottom of ditch and elevations, along with edge of bank elevations for Lambert Creek Ditch 14 as identified on exhibit provided by VLAMO.
- Field as-built of culvert elevations at Koehler Road and Edgerton Street.
- Preparation and drafting of a Certificate of Survey depicting the above information for VLAMO review.
- Deliverables: Signed and Certified Survey electronically in PDF and AutoCAD format.

Estimated Price: \$4,490.00

Assumptions:

- This estimate has been prepared based upon the assumption that field work would be completed in winter months.
- If additional work is requested beyond this scope of work and re-staking is required of any of the above items, work to be billed as an extra at current hourly rates.
- E.G. Rud and Sons terms are net 30 days.

Thank you for the opportunity to provide you with an estimate on this project. Please call me at 651-361-8200 with any additional questions.

Responsive partner.
Exceptional outcomes.

20 October 2017

Mr. Brian Corcoran

Vadnais Lakes Area WMO
800 East Co. Rd. E
Vadnais Heights, MN 55127

Dear Mr. Corcoran

Thank you for the opportunity to provide you with this quote to perform a survey on Lambert Creek (Ramsey County Ditch 14 – CD14). We are excited to partner with you to achieve your goals.

From our conversation we understand that you seek to understand the current condition of the drainage system and assess the repairs that may be needed by collecting the initial survey data required to make these determinations.

Minnesota State Statute 103E.015 contains specific requirements on inspection and assessment of drainage systems. If a repair is needed, an Engineer's Report is required. It is important that the survey includes the data required under the statute so that additional site work is minimized.

Wenck manages drainage systems across the state. We have extensive expertise with drainage system inspections, surveys and all aspects of system repairs including regulatory requirements. Beyond that, we are one of the few companies that integrates drainage with water and natural resource protection.

These things differentiate our survey from a general survey company:

1. Our involvement in your Comprehensive Plan and TMDL's means we understand the challenges and goals of VLAWMO. We also are in the best position to identify multipurpose drainage opportunities – projects and programs that can leverage drainage dollars and other grand sources to achieve conveyance, water quality benefits and natural resource protection and restoration.
2. We provide drainage system records modernization- bringing the data for this drainage system into alignment with current technologies and practices is efficient and cost-effective for future management of the system.
3. We will provide your data in a format consistent with BWSR requirements for drainage system management, and we will collect the data necessary to prepare an Engineer's Report that is needed under 103E.
4. Aerial survey with Drone Technology- We can provide a sample of the format for how we deliver this data.
5. Using an engineering firm with expertise the Minnesota State Statue on Drainage (103E) means you are in a better position if a repair is needed to move that process seamlessly.

We understand that an As-Built Record Drawing for the system is available, and accumulated sediment can be quantified by surveying the center line of the channel.

We also understand that about half of the ditch section to be surveyed is a deep ditch with mature tree cover. Surveying in these areas typical requires use of total station equipment. The

Mr. Corcoran
Vadnais Lakes Area WMO
19 October 2017

use of total station increases cost, but is necessary when tree canopy is mature and dense, even after leaf off.

To that end, to keep costs low, the base proposal offers using one Wenck survey staff member and one VLAWMO staff member to complete the survey. Because we have worked with your field staff, we know that VLAWMO has highly experienced field staff. During this field work, the VLAWMO staff member will not only see the channel and entire drainage system, but also receive valuable training in Drainage System Management that will benefit VLAWMO moving forward in your role as the Drainage Authority.

The proposed tasks, associated costs and schedule are described below.

Scope of Work

The scope of work includes the following: Compile existing drainage maps and as-built drawings. Conduct field survey, collecting ground surface data points at the center line of the channel every 100 feet as required by 103E. Cross sections will be measured at major changes in morphometry or every 500 feet. Photo documentation of channel conditions including restoration opportunities are cataloged. Culverts and infrastructure in the drainage system will be surveyed, described and photographed. All data is provided in a format consistent with BWSR Drainage DB requirements.

Because we have worked with your field staff, we know that VLAWMO has highly experienced field staff. The base option includes field staff support for 9 days for 1 VLAWMO staff member. Deliver raw survey data files to your staff electronically. The base cost for this scope of work is \$12,100.

Optional Tasks

Option 1. Compile data into a report consistent with the requirements for Engineer's Report \$3,200 and provide figures of cross sections, and ditch grade showing aggradation and erosion areas. We will provide verbal recommendations and a discussion of findings in a brief technical memo.

Option 2. If VLAWMO staff does not wish to participate in the field survey, an additional Wenck Staffer can conduct the survey for an additional \$6,800.

Option 3: Drone Survey—a video record of the entire drainage system. This is provided in two formats: a continuous video with inset to reference location within the drainage system as well as a GIS-based segmented video. We would be happy to provide a demonstration of this data so that you can fully appreciate it's benefit in watershed and drainage system management. The drone survey is \$600.

We can also prepare a final Engineers Report consistent with 103E requirements that includes repair recommendations, alternatives, cost and funding strategies. The scope of the can be discussed at your convenience.

Schedule:

Mr. Corcoran
Vadnais Lakes Area WMO
19 October 2017

Responsive partner.
Exceptional outcomes.

It is recommended that the work is done after leaf off in the fall. As discussed, the work will take about 9 days at a maximum.

On behalf of the 300+ employee-owners of Wenck, thank you for this opportunity to work with the Three Lake Improvement District. Should you have any questions, or need clarification of anything presented here, please do not hesitate to call me at 763-252-6824 or e-mail rcarlson@wenck.com.

Sincerely,

A handwritten signature in black ink that reads 'Rebecca Carlson'.

Re: VI.C.2 Lambert Creek – Consideration of maintenance funding request

Estimates for maintenance work from the Koehler flume to Lambert Lake have been received. VLAWMO received 2 estimates for the maintenance work with Outdoor Labs being the lowest at \$32,250. This is for work to remove logs and debris within the creek and truck out for the stretch in yellow on the below map, approx. 1 mile;

Estimates below:

Maintenance Work	Cost
Bolander	\$53,530
Outdoor Labs	\$32,250

Work to complete the tree and debris removal is beyond the 2017 budget. It could potentially be funded in 2018. An option that could be considered to share costs of the work with community in which the work is being done, in this case Vadnais Heights. VLAWMO could do the work sooner with a funding partnership. If VLAWMO were to pay for a percentage of the costs from our existing 2017 maintenance budget, we could pay for 33% of the debris removal costs. As larger maintenance projects on the creek are identified, the projects will need to be added to the VLAWMO Water Plan through the plan amendment process. They will also need to be added to the budget. Larger CIP maintenance projects are at least 2 years out to accommodate plan amendment and budgeting.

Below are options for Board consideration:

Option 1. **No action**

Option 2. **Request a funding partnership from the City of Vadnais Heights.** With current funds in the VLAWMO maintenance budget, VLAWMO could pay for a portion of this effort. You might consider VLAWMO paying one third of the cost (\$10,650) in this request. Disadvantage – Vadnais Height must agree for this to move forward. Advantage – VLAWMO stays within budget.

Option 3. **Delay work until 2018 maintenance work until 2018.** Advantage - there is funding available in 2018. Disadvantage – work is delayed and bids will expire. The costs may go up in 2018. The Board may want to use the 2018 Lambert funds to do an engineering study, see discussion below.

Also, the Board may want to use 2018 funding to hire engineering help to model the hydraulic capacity of the whole system, establish profile elevations that could be used for future work and start to develop a maintenance schedule.

Separate from the work above, the City of Vadnais Heights has submitted an application for permit to the DNR electronically through MPARS, with the assistance of VLAWMO staff, to perform maintenance of Branch Ditch #5A to restore drainage flow and capacity of the system. Maintenance includes the mechanical removal of debris, most of which has fallen locally into the Ditch, within the original footprint of the Branch Ditch, but **does not** include ditch repair by excavating sediments from the Ditch. The Project is roughly 5,400 feet in length with approximate cost of \$120,000. Debris will be trucked from site.

VLAWMO Ditch Cleaning 2017

Carl Bolander - estimate for work to be completed

Ditch 105	1760 LF	\$ 13.00	\$ 22,880.00
Ditch 14	2400 LF	\$ 11.00	\$ 26,400.00
Wetland -Lambert	850 LF	\$ 5.00	\$ 4,250.00
Total	5010 LF	Total	\$ 53,530.00

Outdoor Lab Landscape Design Inc, Project Manager Date

Client's Signature

The undersigned agrees to the scope of work, price, and payment terms described above.
Payment Terms: Net 30 Days

Plant materials are subject to availability and substitutions may be made as necessary. All trees and woody plant materials are warranted for one year from the date of the projects completion. Warranty does not cover lack of proper care, animal, vehicle, storm, drought, vandalism or human caused damage. Outdoor Lab Landscape Design Inc proposes to furnish material and labor complete in accordance with the above description of work to be completed and cost estimate. All work is to be completed in a workman like manner according to standard practices. Any alteration or deviation from the above description of work to be completed involving additional cost will be executed only upon written order and will be charged over and above this estimate. All labor and material is conclusively accepted as satisfactory unless expressed in writing within 60 days of performance. All agreements are contingent upon strikes, accidents or delays beyond our control. Damage to driveways, underground structures (wires, cables, irrigation) is the responsibility of the party accepting this agreement. Measures shall be taken on the part of Outdoor Lab Landscape Design, Inc to ensure the site is prepared to prevent foreseeable damage due to weather during the installation period. Any delays or damage to landscaped area due to weather may be charged over and above this estimate. This agreement gives consent to Outdoor Lab the use of photograph of work completed by Outdoor Lab for training, literature and marketing of Outdoor Lab

PLEASE TAKE NOTICE; ANY PERSON OR COMPANY SUPPLYING LABOR OR MATERIALS FOR THIS IMPROVEMENT TO YOUR PROPERTY MAY FILE A LIEN AGAINST YOUR PROPERTY IF THAT PERSON OR COMPANY IS NOT PAID FOR THE CONTRIBUTIONS. UNDER MINNESOTA LAW, YOU HAVE THE RIGHT TO PAY PERSONS WHO SUPPLIED LABOR, EQUIPMENT, OR MATERIALS FOR THIS IMPROVEMENT DIRECTLY AND DEDUCT THIS FROM OUR CONTRACTORS PRICE, OR WITHHOLD THE AMOUNTS DUE THEM FROM US UNTIL 120 DAYS AFTER THE COMPLETION OF THE IMPROVEMENT UNLESS WE GIVE YOU A LIEN WAIVER SIGNED BY PERSONS WHO SUPPLIED ANY LABOR OR MATERIAL FOR THE IMPROVEMENT AND WHO GAVE YOU TIMELY NOTICE.

TEC Report to the Board
October 2017

Programs & Projects	Effort Level	Completion Date	Comments
	LOW		
	MED		
	HIGH		
Projects			
Priority Lakes	HIGH	2017	Alum dosing assessment for Goose will be doing sediment cores in Oct. Vegetation surveys are done on Wilkinson. Fish surveys are complete for Goose & Wilkinson.
Sucker Lake Channel	MED	2017	The construction is starting this month. The native landscaping bidding will go this fall. SPRWS is planning to remove zebra mussel shells again this year. 8 20-yd dumpsters were removed last year.
Lambert Creek - Koehler	LOW	2017	Project complete, grant finalized
Birch Lake	HIGH	2017	The automated sampler is installed at 4th & Otter project with storm sampling results coming in. We should hear on grant request in December.
Whitaker Wetlands	MED	2017	Belair Construction is hard at work on the installation.
Programs			
Outreach	HIGH	ongoing	Installing Whitaker Treatment Wetlands signage, coordinating WAV events to double as outreach tools.
Education	MED	ongoing	Partnerships with H2O for life, WB Schools, and AFSA are actively planning. November 21st is scheduled for a road salt/parking lot training in partnership with Fortin Consulting and Ramsey Washington MWD.
Website	MED	ongoing	A Lambert Creek educational video has been posted in addition to expanded wetland information and resources under the "residents/wetlands 101" tab.
WAV	LOW	ongoing	October 28th and November 11th are planned volunteer days for cleaning stormdrains, labeling drains with "no dumping" signs, and informing residents of nearby projects to where the events are taking place. I.e. Goose Lake improvement and the Sucker channel restoration. AFSA volunteers maintained Lions and VH Elementary raingarden this fall.
Cost Share	LOW	ongoing	LL1 funds are depleted for 2017; LL2 has \$20,000 left currently
GIS	MED	ongoing	SSU databases, ArcGIS online, maps for ditch maintenance
Monitoring	MED	ongoing	2017 season of monitoring is wrapping up.
Admin & Operation			
SLMPs	MED	2017	Charley Lake SLMP is currently being worked on; studies being completed.
Audit & annual reporting	LOW	May 2017	Annual audit and report is complete and has been distributed. They are available on the website and in the office.
Administration	HIGH	2017	The SSU fees for next year will be certified to the counties at the October Board mtg. Completing the monthly bookkeeping internally is going well.
WCA	MED	ongoing	A wetland boundary update in WBL (Larey) was approved. The incidental wetland request has been denied.
